EXPERIENCE

Global Lead Data Scientist

Jan 2025 - Present

Nexus Brands Group

Operating across all 18 businesses within the group. Core role in the formation of the Global Finance and Data Analytics Department. Built a full suite of centralised global reporting and extensive custom dashboarding — from the 50,000ft strategic view to microscopic operational detail — enabling teams at all levels to make data-driven decisions.

- **Team Leadership:** Built and lead a high-performing global team of PhD-level data scientists and engineers
- **Centralised Reporting:** Delivered full suite of centralised global reporting, replacing fragmented legacy systems with a universal architecture
- **Custom Dashboarding:** Extensive Streamlit dashboards with Entra SSO, enabling teams at every level to make data-driven decisions
- **AI-Assisted Development:** Extensive use of AI-assisted development (Claude Code) to accelerate delivery of data products and pipelines
- **Operational Reporting:** OTIF increased by **25%**, identified **millions** in E&O inventory, detecting **~1% revenue** in OOS sales loss
- **KPI Strategy:** EOS Level 10 executive scorecard aligning KPIs with operational priorities
- **Advanced Analytics:** Data science initiatives focused on customer behavior, margin improvement, and strategic growth

European Data Scientist

Apr 2023 - Jan 2025

Nexus Brands Group

Developed the data function from scratch for 5 European businesses across tattoo, beauty, and pet grooming supply, bringing clarity and structure to increasingly complex operations. Consolidated fragmented data sources into a universal data warehouse, enabling consistent automated reporting. Promoted to Global Lead.

Data Scientist

May 2022 - Apr 2023

Christies Direct

Built the Data Science function from scratch at one of the world's largest pet-grooming supply companies, bringing data-driven clarity to a rapidly growing business. Created unified reporting across Christies and sister company Transgroom. Promoted to European Data Scientist.

Astrophysics PhD

Sep 2017 - Feb 2022

Queen's University Belfast

Joint venture with Radox Laboratories developing statistical techniques for astrophysical and biomedical analysis. Developed algorithms for large-scale statistical analysis of below-noise-floor signals, leading to novel discoveries of stellar nanoflares. Created image feature recognition software achieving **98.8%** reduction in processing times (saving **600+ seconds**), key component of biochip diagnostics pipeline in **\$12B** industry.

PUBLICATIONS

2023	Nanoflare Activity on Fully Convective M-dwarf Stars Grant et al. The Astrophysical Journal
2020	Statistical Evidence for Stellar Nanoflare Signals in M-type Lightcurves Dillon et al. The Astrophysical Journal
2019	Monte Carlo Techniques for Nanoflare Detection in Solar Active Regions Jess et al. The Astrophysical Journal

EDUCATION

MSci Physics, First Class Honours

Sep 2013 - Jun 2017

Queen's University Belfast

Seagate bursary recipient. Head of peer mentor scheme.

SKILLS

LANGUAGES

Python
SQL
R

DATA SCIENCE

Machine Learning
Predictive Modelling
A/B Testing
NLP / Time Series

DATA ENGINEERING

Data Warehousing
ETL Pipelines
Data Modelling

TOOLS

Streamlit
Git / Docker
Claude Code / AI Dev

LEADERSHIP

Building Data Teams
Hiring & Recruitment
Mentoring & Development
Data Strategy

MANAGEMENT

Stakeholder Management
Cross-functional Delivery
Agile / Scrum

DOMAIN

E-commerce Analytics
Customer Segmentation
Supply Chain / OTIF

INDUSTRY

Retail / Wholesale
Biomedical Diagnostics
Astrophysics Research
