EXPERIENCE

Global Lead Data Scientist

Jan 2025 - Present

Nexus Brands Group

Operating across all 18 businesses within the group. Core role in the formation of the Global Finance and Data Analytics Department, centralizing finance and data operations globally.

- **Team Leadership:** Building and managing a high-performing global data team
- **Standardization:** Designing universal data and reporting architecture to replace fragmented legacy systems
- **Self-Service Analytics:** Developing Streamlit dashboards with Entra SSO across dashboards and BI
- **Operational Reporting:** Supply chain reporting including:
 - OTIF performance tracking - increased by **25%**
 - E&O Stock management - identified **millions** in excess inventory
 - OOS monitoring - detecting **~1% revenue** in sales loss
- **KPI Strategy:** Implemented EOS Level 10 executive scorecard
- **Advanced Analytics:** Customer behavior, margin improvement, strategic growth initiatives

European Data Scientist

Apr 2023 - Jan 2025

Nexus Brands Group

Transformed data function for 5 European businesses across tattoo, beauty, and pet grooming supply. Consolidated fragmented data sources into universal data warehouse. Promoted to Global Lead based on this work.

Data Scientist

May 2022 - Apr 2023

Christies Direct

Built Data Science function from scratch at one of the world's largest pet-grooming supply companies. Created unified reporting across Christies and Transgroom. Promoted to European Data Scientist.

Research Fellow

Jan 2022 - Apr 2022

Radox Laboratories

Developed bespoke image feature recognition software for biochip designs. Created technical documentation for biomedical colleagues.

Astrophysics PhD

Sep 2017 - Feb 2022

Queen's University Belfast

Joint venture with Radox Laboratories developing statistical techniques for astrophysical and biomedical analysis. Developed algorithms for large-scale statistical analysis of below-noise-floor signals. Created image feature recognition software achieving **98.8%** reduction in processing times (saving **600+ seconds**), key component of biochip diagnostics pipeline in **\$12B** industry.

Process Engineering Intern

Jun 2015 - Sep 2016

Seagate Technology

Led investigation into manufacturing defect. Presented findings to management. Experience with R and Six Sigma methodology.

EDUCATION

MSci Physics, First Class Honours

Sep 2013 - Jun 2017

Queen's University Belfast

Seagate bursary recipient. Head of peer mentor scheme coordinating 14 mentors supporting 100 students.

SKILLS

LANGUAGES

Python

DATA

Statistical Analysis

TOOLS

Streamlit

SQL
R
IDL

Machine Learning
Data Warehousing
ETL Pipelines

Power BI
Git
Docker

LEADERSHIP

Building Data Teams
Function Development
Stakeholder Management
Cross-functional Delivery

DOMAIN

E-commerce Analytics
Customer Segmentation
Supply Chain / OTIF
Inventory Optimisation

INDUSTRY

Retail / Wholesale
Biomedical Diagnostics
Manufacturing
